## Amendment to Licence

The Radiation Safety Act 1975 requires anyone dealing with irradiating apparatus, electronic products or radioactive substances prescribed by the Act to hold a current licence, temporary permit or exemption for the particular purpose, as appropriate to the circumstances.

Complete this form for amendment to a licence for irradiating apparatus, electronic products or radioactive substances.

A separate form needs to be provided for amendment to a registration.

### Notes

1. The form **must** be signed by the licence holder to be valid; unsigned forms will not be accepted. Please fill in **all** the required details then send the form to the Secretary of the Radiological Council –

*Email*                    [radiation.health@health.wa.gov.au](mailto:radiation.health@health.wa.gov.au) *(Please also include licence number in the subject of the email)*

For further enquiries, contact the Radiological Council on +61 8 9222 0888. See also [www.radiologicalcouncil.wa.gov.au](http://www.radiologicalcouncil.wa.gov.au)

2. **Licence number:**

The whole licence number must be quoted, for example *LS 100/1997 12345* or *LX 100/1997 12345*. Your licence number can be found at the bottom of your licence certificate.

3. **Addition/removal of radioactive substances:**

For the addition, increase or removal of radioactive substances, an individual written request must still be submitted to the Radiological Council.
